## SELF PROPELLED VERTICAL LIFT

Skyjack has established itself as an industry leader in providing the most robust and reliable aerial work platforms. Skyjack's new self propelled vertical lifts are no different, utilizing the same design features while providing a compact footprint and superior maneuverability. Models are available in two configurations; the SJ 12 with a working height of 5,48 m, and the SJ 16 with a working height of 6,70 m.

When operating in tight workspaces, a high degree steer angle allows both models superior functionality

and flexibility by offering zero inside turning radius. The SJ 12 and SJ 16 also both feature a 0,41 m traversing platform, providing increased access and the ability to reach over potential obstacles. A unique slide away platform provides easy access to components, when raised or in the stowed position.

Skyjack's standard colour coded and numbered wiring system with hard-wired relay based controls help to ensure the new SJ 12 and SJ 16 live up to Skyjack's leading reputation for quality and serviceability.
